PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 60 ISSUE 1 JULY 1994

INVITED REVIEW

Molecular mechanisms and quantitative models of variable photosystem II fluorescence — 1 — Holger Dau

PHOTOCHEMISTRY AND PHOTOPHYSICS

A fluorescence study of tryptophan–histidine interactions in the peptide anantin and in solution — 24 — Rita Vos and Yves Engelborghs

Photochemistry of 5-*S*-cysteinyldopa — 33 — Claudio Costantini, Marco d'Ischia, Anna Palumbo and Giuseppe Prota

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Understanding photosynthesis, pigment and growth responses induced by UV-B and UV-A irradiances — 38 — Elizabeth M. Middleton and Alan H. Teramura

PHOTOSYNTHESIS AND PHOTOCONVERSION

Computer simulation of exciton jumping statistics and energy flow in C-phycocyanin of algae *Agmenellum quadruplicatum* in the presence of traps — 46 — Andrey A. Demidov and Alexander Yu. Borisov

PHOTOMEDICINE

UVA photolysis using the protein-bound sensitizers present in human lens — 53 — B. J. Ortwerth and P. R. Olesen

Impaired accumulation of a cationic photosensitizing agent by a cell line exhibiting multidrug resistance — 61 — David Kessel, Kathryn Woodburn and Dimitris Skalkos

PHOTOSENSORY BIOLOGY

Azidotetrafluorophenyl retinal analogue: synthesis and bacteriorhodopsin pigment formation — 64 — Charles J. Beischel, Daniel R. Knapp, Rajni Govindjee, Thomas G. Ebrey and Rosalie K. Crouch

pH dependence of the absorption spectra and photochemical transformations of the archaerhodopsins — 69 — E. P. Lukashev, R. Govindjee, Masahiro Kono, T. G. Ebrey, Yasuo Sugiyama and Yasuo Mukohata

Purification and characterization of a riboflavin-binding protein from flagella of *Euglena gracilis* — 76 — Ralf Neumann and Rainer Hertel

PHOTOTECHNOLOGY

A laboratory investigation of two ultraviolet spectroradiometers — 84 — A. R. Webb, B. G. Gardiner, M. Blumthaler, P. Forster, M. Huber and P. J. Kirsch

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 60 ISSUE 2 AUGUST 1994

PHOTOCHEMISTRY AND PHOTOPHYSICS

Investigations on the light-emitting species in the reaction of metmyoglobin and methemoglobin with hydrogen peroxide — 91 — Klaus Stolze, Yang Liu and Hans Nohl

Photochemical and photobiological properties of ketoprofen associated with the benzophenone chromophore — 96 — Francisco Boscá, Miguel A. Miranda, Germano Carganico and David Mauleón

Benzophenone photosensitization of 2′-deoxyguanosine: characterization of the 2R and 2S diastereoisomers of 1-(2-deoxy-β-D-*erythro*-pentofuranosyl)-2-methoxy-4,5-imidazolidinedione. A model system for the investigation of photosensitized formation of DNA-protein crosslinks — 102 — Bénédicte Morin and Jean Cadet

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Amelioration of UV-B damage under high irradiance. II: Role of blue light photoreceptors — 110 — Paulien Adamse, Steven J. Britz and Charles R. Caldwell

UV-B-induced increase in specific leaf weight of cucumber as a consequence of increased starch content — 116 — Steven J. Britz and Paulien Adamse

The effects of growth-inhibiting treatments on photorepair in cultured fish cells — 120 — Mariko Kondo, Hiroshi Mitani and Akihiro Shima

DNA photolyase from the fungus *Neurospora crassa*. Purification, characterization and comparison with other photolyases — 125 — A. P. M. Eker, H. Yajima and A. Yasui

The effects of ultraviolet C on *in vitro* nucleosome assembly and stability — 134 — Hideki Matsumoto, Akira Takakusu and Takeo Ohnishi

PHOTOSYNTHESIS AND PHOTOCONVERSION

Structure and conformation of photosynthetic pigments and related compounds 7. On the conformation of the methyl ester of (20-methyl-phytochlorinato)nickel(II)—a bacteriochlorophyll *c* model compound — 139 — Mathias O. Senge and Kevin M. Smith

PHOTOMEDICINE

Enhancement of Nile blue derivative-induced photocytotoxicity by nigericin and low cytoplasmic pH — 143 — Chi-Wei Lin and Janine R. Shulok

Accessory cell ability of Langerhans cells for superantigen is resistant to ultraviolet-B light — 147 — Yoshiki Tokura, Hiroaki Yagi, Hideo Hashizume, Junji Yagi, Fukumi Furukawa and Masahiro Takigawa

Biodistribution and PDT efficacy of a ketochlorin photosensitizer as a function of the delivery vehicle — 154 — Kathryn Woodburn, C. K. Chang, Sangwan Lee, Barbara Henderson and David Kessel

Effectiveness of photofrin II in activation of macrophages and *in vitro* killing of retinoblastoma cells — 160 — Nobuto Yamamoto, Theodore W. Sery, J. Kenneth Hoober, Norman P. Willett and Dwight D. Lindsay

New phthalocyanines for photodynamic virus inactivation in red blood cell concentrates — 165 — S. Rywkin, E. Ben-Hur, Z. Malik, A. M. Prince, Y.-S. Li, M. E. Kenney, N. L. Oleinick and B. Horowitz

Products of psoralen photooxidation possess immunomodulative and antileukemic effects — 171 — A. Ya. Potapenko, A. A. Kyagova, L. N. Bezdetnaya, E. P. Lysenko, I. Yu. Chernyakhovskaya, V. A. Bekhalo, E. V. Nagurskaya, V. A. Nesterenko, N. G. Korotky, S. N. Akhtyamov and T. M. Lanshchikova

PHOTOSENSORY BIOLOGY

Interactions of both melittin and its site-specific mutants with bacteriorhodopsin of *Halobacterium halobium*: sites of electrostatic interaction on melittin — 175 — Qiu-Xing Jiang, Kun-Sheng Hu and Hua Shi

PHOTOTECHNOLOGY

A fully automated dual-wavelength photometer for phytochrome measurements and its application to phytochrome from chlorophyll-containing extracts — 179 — Tilman Lamparter, Jon Hughes, and Elmar Hartmann

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 60 ISSUE 3 — SEPTEMBER 1994

PHOTOCHEMISTRY AND PHOTOPHYSICS

Psoralen-olefin photoproducts: first observation of a photo-ene reaction — 185 — David J. Semin, Paul C. Winkler and Kathy L. Rowlen

The presence of photoreactive β-carboline fluorophores in weathered wool keratin — 196 — Gerald J. Smith, Kenneth R. Markham and W. Hugh Melhuish

EPR and TREPR spectroscopic studies of antioxidant sesamolyl and related phenoxyl radicals — 199 — Kouichi Nakagawa, Shozo Tero-Kubota, Yusaku Ikegami and Nobuaki Tsuchihashi

Distance-dependent fluorescence quenching of tryptophan by acrylamide — 205 — Joseph R. Lakowicz, Bogumil Zelent, Ignacy Gryczynski, Józef Kuśba and Michael L. Johnson

The photochemical properties of fluoroaluminum phthalocyanine — 215 — I. Rosenthal, V. Y. Shafirovich, N. E. Geacintov, E. Ben-Hur and B. Horowitz

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Excision of cyclobutane dimers in genomic and episomal DNA in human cells — 221 — David L. Mitchell, James E. Cleaver and Louise H. Lutze

Photoactivated gilvocarcin V induces DNA-protein crosslinking in genes for human ribosomal RNA and dihydrofolate reductase — 225 — Akira Matsumoto, Yoshisada Fujiwara, Rosalie K. Elespuru and Philip C. Hanawalt

PHOTOSYNTHESIS AND PHOTOCONVERSION

Laser flash-induced photoreduction of photosynthetic ferredoxins and flavodoxin by 5-deazariboflavin and by a viologen analogue — 231 — José A. Navarro, Manuel Hervás, José J. Pueyo, Milagros Medina, Carlos Gómez-Moreno, Miguel A. De la Rosa and Gordon Tollin

Influence of the pool size of the xanthophyll cycle on the effects of light stress in a diatom: competition between photoprotection and photoinhibition — 237 — Wafa Arsalane, Bernard Rousseau and Jean-Claude Duval

PHOTOMEDICINE

Ca^{2+} influx induced by photodynamic action in human cerebral glioma (U-87 MG) cells: possible involvement of a calcium channel — 244 — Preeti G. Joshi, Kunju Joshi, Sudha Mishra and Nanda B. Joshi

Photoreactivity of Chloramphenicol *in vitro* and *in vivo* 249 Henk de Vries, Peter J. Hemelaar, Alice C. M. Gevers and Gerard M. J. Beyersbergen van Henegouwen

Hypocrellin, from *Hypocrella bambuase*, is phototoxic to human immunodeficiency virus 253 J. B. Hudson, J. Zhou, J. Chen, L. Harris, L. Yip and G. H. N. Towers

Comparative potency of different UV sources in reducing the density and antigen-presenting capacity of Langerhans cells in C3H mice 256 Ali A. El-Ghorr, Frank Pierik and Mary Norval

Afloqualone photosensitivity: immunogenicity of afloqualone-photomodified epidermal cells 262 Yoshiki Tokura, Masaaki Ogai, Hiroaki Yagi and Masahiro Takigawa

Lack of correlation between suppression of contact hypersensitivity by UV radiation and photoisomerization of epidermal urocanic acid in the hairless mouse 268 Vivienne E. Reeve, Christa Boehm-Wilcox, Meira Bosnic, Ranald Cope and Ronald D. Ley

In vivo pH measurement and imaging of tumor tissue using a pH-sensitive fluorescent probe (5,6-carboxyfluorescein): instrumental and experimental studies 274 Serge Mordon, Jean Marie Devoisselle and Vincent Maunoury

Sunscreens with broad-spectrum absorption decrease the *trans* to *cis* photoisomerization of urocanic acid in the human *stratum corneum* after multiple UV light exposures 280 Paul M. Krien and Dominique Moyal

PHOTOTECHNOLOGY

Personal dosimetry of solar UV radiation for different outdoor activities 288 Ellen Herlihy, Peter H. Gies, Colin R. Roy and Michael Jones

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 60 ISSUE 4 OCTOBER 1994

PHOTOCHEMISTRY AND PHOTOPHYSICS

Photosensitized formation of 8-hydroxy-2′-deoxyguanosine and DNA strand breakage by a cationic *meso*-substituted porphyrin 295 Thomas M. Nicotera, Benjamin R. Munson and Robert J. Fiel

Femtosecond studies of hematoporphyrin derivative in solution: effect of pH and solvent on the excited state dynamics 301 J. Z. Zhang, R. H. O'Neil and J. E. Evans

Doubly allylic hydroperoxide formed in the reaction between sterol 5,7-dienes and singlet oxygen 310 Phillip W. Albro, Jean T. Corbett and Joanna L. Schroeder

Targeted photochemical modification of HIV-derived oligoribonucleotides by antisense oligodeoxynucleotides linked to porphyrins 316 Lidia Mastruzzo, Anne Woisard, David D. F. Ma, Enrico Rizzarelli, Alain Favre and Trung Le Doan

Damage to uracil- and adenine-containing bases, nucleosides, nucleotides and polynucleotides: quantum yields on irradiation at 193 and 254 nm 323 Gagik G. Gurzadyan and Helmut Görner

Photooxidation of 2-mercaptoethanol by various water-soluble phthalocyanines in aqueous alkaline solution under irradiation with visible light 333 Gerhard Schneider, Dieter Wöhrle, Wolfgang Spiller, Johannes Stark and Günter Schulz-Ekloff

Assessment of dielectric enrichment around two fluorophores in binary solvents 343 Walter Zurawsky and Suzanne Scarlata

Merocyanine dyes: effect of structural modifications on photophysical properties and biological activity 348 Robert W. Redmond, Monvadi B. Srichai, James M. Bilitz, David D. Schlomer and Marianne Krieg

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Ultraviolet solar radiation in the high latitudes of South America 356 J. E. Frederick, S. B. Diaz, I. Smolskaia, W. Esposito, T. Lucas and C. R. Booth

Alfalfa seedlings grown outdoors are more resistant to UV-induced DNA damage than plants grown in a UV-free environmental chamber 363 Shinnosuke Takayanagi, John G. Trunk, John C. Sutherland and Betsy M. Sutherland

PHOTOMEDICINE

Hematoporphyrin derivative (Photofrin ®) photodynamic action on Ca^{2+} transport in monkey kidney cells (CV-1) 368 Marc Dellinger, Fernanda Ricchelli, Giuliana Moreno and Christian Salet

Effects of *in vitro* exposure to ultraviolet radiation on the functional activity of lymphocytes, with emphasis on susceptibility of different species 373 Wim Goettsch, Johan Garssen, Monique H. Hurks, Frank R. De Gruijl and Henk Van Loveren

Observed and predicted minimal erythema doses: a comparative study 380 B. L. Diffey

Wavelength-dependent effects of benzoporphyrin derivative monoacid ring A *in vivo* and *in vitro* 383 Elizabeth M. Waterfield, Martin E. Renke, Claire B. Smits, Michele D. Gervais, Robert D. Bower, Michael S. Stonefield and Julia G. Levy

PHOTOSENSORY BIOLOGY

Shape of the chromophore binding site in *pharaonis* phoborhodopsin from a study using retinal analogs 388 Junichi Hirayama, Yasushi Imamoto, Yoshinori Shichida, Tôru Yoshizawa, Alfred E. Asato, Robert S. H. Liu and Naoki Kamo

Laser photolysis of the purple membrane of *Halobacterium halobium* in the photostationary state: the photobranching process from the O_{640} intermediate 394 Hiroyuki Ohtani, Satoru Naramoto and Noritaka Yamamoto

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 60 ISSUE 5 NOVEMBER 1994

PHOTOCHEMISTRY AND PHOTOPHYSICS

Photophysical study of the Schiff bases of 5′-deoxypyridoxal and *n*-hexylamine in cationic micelles 399 Miguel A. Vázquez Segura, Josefa Donoso, Francisco Muñoz, Francisco García Blanco, M. Angeles García del Vado and Gerardo Echevarría

Visible chemiluminescence associated with the reaction between methemoglobin or oxyhemoglobin with hydrogen peroxide 405 Eduardo A. Lissi, Jorge Escobar, Carlos Pascual, Maria del Castillo, Tais H. Schmitt and Paolo Di Mascio

ArF excimer laser-induced bubble formation during irradiation of NaCl solutions 412 Igor Turovets, Daniel Palanker and Aaron Lewis

Photoinduced reduction of cytochrome *c* in the presence of hydroperoxide derivative of biphenyl 415 Seiichi Matsugo, Nobuko Kayamori-Sato and Tetsuya Konishi

Spectroscopy and photosensitization of sapphyrins in solutions and biological membranes 421 Leonid Roitman, Benjamin Ehrenberg, Yeshayahu Nitzan, Vladimir Kral and Jonathan L. Sessler

Photochemical stability of biologically active compounds. IX. Characterization of the spectroscopic properties of the 4-aminoquinolines, chloroquine and hydroxychloroquine, and of selected metabolites by absorption, fluorescence and phosphorescence measurements 427 Karin Nord, Jan Karlsen and Hanne Hjorth Tønnesen

Facile characterization of the spectra of *cis* and *trans* photoisomers in a mixture of acyl-enzymes by Raman difference spectroscopy 432 John D. Doran, Peter J. Tonge, Munsok Kim and Paul R. Carey

Steady-state fluorescence method for evaluating excited state proton reactions: application to fluorescein 435 Juan Yguerabide, Eva Talavera, Jose María Alvarez and Bartolomé Quintero

Photochemistry of 2-mercaptopyridines. Part 1. An EPR and spin-trapping investigation using 5,5-dimethyl-1-pyrroline *N*-oxide in aqueous and toluene solutions 442 Krzysztof J. Reszka and Colin F. Chignell

Photochemistry of 2-mercaptopyridines. Part 2. An EPR and spin-trapping investigation using 2-methyl-2-nitrosopropane and *aci*-nitromethane as spin traps in aqueous solutions 450 Krzysztof J. Reszka and Colin F. Chignell

An ^{125}I-labeled N^6-substituted azido analog of NAD^+ for the photoaffinity labeling of NAD^+-linked enzymes 455 Pei-Lin Chen, Charles Mark Ensor and Hsin-Hsiung Tai

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Phototoxicity of citral to *Trichoplusia ni* (Lepidoptera: Noctuidae) and its amelioration by vitamin A 459 Ellen S. Green and May R. Berenbaum

Penetration of solar UV irradiation in coastal lagoons of the southern Baltic Sea and its effect on phytoplankton communities 463 H. Fiazena and D.-P. Häder

A dosimetric technique for the measurement of ultraviolet radiation exposure to plants 470 A. V. Parisi and C. F. Wong

PHOTOMEDICINE

8-Methoxypsoralen increases daytime plasma melatonin levels in humans through inhibition of metabolism 475 E. Garde, S. Micic, K. Knudsen, H. R. Angelo and H. C. Wulf

Does low-intensity He–Ne laser radiation produce a photobiological growth response in *Escherichia coli*? 481 L. L. Daniels and T. I. Quickenden

A comparison of direct and liposomal antibody conjugates of sulfonated aluminum phthalocyanines for selective photoimmunotherapy of human bladder carcinoma 486 Janet Morgan, Henri Lottman, Claude C. Abbou and Dominique K. Chopin

Enhanced macrophage cytotoxicity against tumor cells treated with photodynamic therapy 497 Mladen Korbelik and Gorazd Krosl

Reduced photoinactivation of 10-dodecyl acridine orange-sensitized yeast cells at high fluence rates: measurements and computer simulations 503 Jan F. Keij, Jan Th. M. Jansen, Frank W. Schultz and Jan W. M. Visser

PHOTOSENSORY BIOLOGY

Bathochromicity of retinal Schiff bases in cellulose matrix 510 Anil K. Singh and Nirmalya Majumdar

Evidence for the existence of membrane-associated phytochrome in the cell 516 Vitally Sineshchekov, Tilman Lamparter and Elmar Hartmann

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 60 ISSUE 6 DECEMBER 1994

INVITED REVIEW

Protein structure modelling of the bacterial light-harvesting complex 521 J. D. Olsen and C. N. Hunter

RAPID COMMUNICATION

Preparation and photophysical studies of porphyrin-C_{60} dyads 537 Paul A. Liddell, John P. Sumida, Alisdair N. Macpherson, Lori Noss, Gilbert R. Seely, Kristine N. Clark, Ana L. Moore, Thomas A. Moore and Devens Gust

PHOTOCHEMISTRY AND PHOTOPHYSICS

Synthesis and photochemical properties of nitrothienyl derivatives 542 Maurizio D'Auria and Giacomo Mauriello

Light quenching of fluorescence: a new method to control the excited state lifetime and orientation of fluorophores 546 Joseph R. Lakowicz, Ignacy Gryczyński, Józef Kuśba and Valery Bogdanov

Photoluminescent properties of octadecylrhodamine B in water, in alcohols and in mixed water–alcohol solutions 563 Kenichi Nakashima and Yoshinori Fujimoto

4′-Aminomethyl-4,5′,8-trimethylpsoralen photochemistry: the effect of concentration and UVA fluence on photo-adduct formation in poly(dA-dT) and calf thymus DNA 567 Asha Oroskar, Gerard Olack, Meyrick J. Peak and Francis P. Gasparro

Photochemical sensitization by azathioprine and its metabolites. Part 3. A direct EPR and spin-trapping study of light-induced free radicals from 6-mercaptopurine and its oxidation products 574 Douglas E. Moore, Robert H. Sik, Piotr Bilski, Colin F. Chignell and Krzysztof J. Reszka

Absorption spectrum of hematoporphyrin derivative *in vivo* in a murine tumor model 582 Rinaldo Cubeddu, Gianfranco Canti, Mario Musolino, Antonio Pifferi, Paola Taroni and Gianluca Valentini

Molecular basis of drug phototoxicity: photosensitized cell damage by the major photoproduct of tiaprofenic acid 586 Jose V. Castell, Maria J. Gomez-Lechon, Daniel Hernandez, Luis A. Martinez and Miguel A. Miranda

Photoactive terthiophenes: the influence of serum on anti-HIV (human immunodeficiency virus) activities 591 J. B. Hudson, R. J. Marles, C. Soucy-Breau, L. Harris and J. T. Arnason

PHOTOSENSORY BIOLOGY

Chromophore orientation in the photoreceptor of *Chlamydomonas* as probed by stimulation with polarized light 594 Kenjiro Yoshimura

Presumed photoreceptor protein and ultrastructure of the photoreceptor organelle in the ciliated protozoan, *Blepharisma* 598 Tatsuomi Matsuoka, Takenori Tsuda, Masaki Ishida, Yoji Kato, Miyuki Takayanagi, Takeshi Fujino and Shun Mizuta

PHOTOTECHNOLOGY

Reproducible preparation of silver sols with uniform particle size for application in surface-enhanced Raman spectroscopy 605 Siegfried Schneider, Peter Halbig, Harald Grau and Ulrich Nickel
